FOR  
FIRE  
SERVICE  
PERSONNEL**

The California Fire Mechanics Academy, Inc., in conjunction with the California Fire Chiefs Association, American River College Sacramento Regional Public Safety Training Center, Sacramento Metropolitan Fire District, and the Roseville Fire Department is pleased to announce the 40th anniversary fire mechanics academy program. There are several new and exciting classes being offered this year including classes designed specifically for firefighters, engineers and officers wanting to know more about the apparatus they are responsible for. The academy classes will once again be held at McClellan Business Park located in Sacramento, California. This converted former Air Force base provides the academy with the classrooms, shops and open spaces required to present the best possible program to our students.

You will find classes specifically designed to provide the latest information regarding a variety of maintenance, service and repair activities related to fire apparatus and equipment.

Registration is being accepted until March 15, 2010. Act now to ensure you will be able to get your first choice class selections. Download the complete information/registration packet from the Academy website at [www.cafiremech.com](http://www.cafiremech.com).

**PLEASE NOTE that CFM-115 Fire Pumps & Accessories is FULL.**
